

▶ The Wizard

Enhance knowledge transfer and project execution with an online resource center.

Lean Six Sigma can be both rewarding and challenging. Projects often require students and practitioners to apply new, unfamiliar, or seldom used tools. To ensure the greatest opportunity for success, BMGI has developed the Wizard, an online resource center for Lean Six Sigma practitioners.

The Wizard extends learning beyond the classroom with recorded flash-based, interactive lectures, quizzes, tools, templates, project support, case studies and a live Master Black Belt chat room.

What is the Wizard?

The Wizard is a web-based, interactive system that provides subscribers with detailed guidance and information on almost any Lean Six Sigma topic. Featuring Lean Six Sigma templates, tools and study aids, and a live chat room with experienced Master Black Belts. The Wizard ensures students and practitioners have everything they need to complete a project, apply learnings and test their knowledge.

“The Wizard was one of the main reasons we chose BMGI. We have people all over the world and the Wizard helped us support them remotely.”

— Shari Baumgart

Key Features

▶ Interactive eLearning Lectures with Audio

The Wizard offers interactive, Flash-based lectures on key Lean Six Sigma topics. Practitioners can view the lectures online at their leisure. Many lectures include Minitab and Excel examples so students can put their skills to use instantly with samples to guide them.

▶ Live Master Black Belt Chat

A distinctive feature of the Wizard is the Master Black Belt online chat. Convenient sessions throughout the day make it easy for students to seek guidance and receive immediate feedback on their most pressing Lean Six Sigma questions. BMGI’s MBB experts have real-world knowledge. As previous deployment leaders, corporate MBBs and business strategists, they understand the challenges of completing Lean Six Sigma projects, and the complexity of the subject matter.

▶ Quizzes & Exams

The Wizard’s online quizzes provide a valuable way for new practitioners of Lean Six Sigma to verify their knowledge in a non-threatening manner. Students of Lean Six Sigma can discover where they need improvement before attempting their certification exams. In addition, BMGI Lean Six Sigma students take their certification exams in the Wizard.

KEY BENEFITS

- ❑ Increase learning, retention and project execution. Review topics and self-test at any time, boosting understanding.
- ❑ Find information quickly. Comprehensive catalog lets you search on almost any Lean Six Sigma topic.
- ❑ Get expert advice when you need it.
- ❑ Refresh your skills. Just-in-time training is at your fingertips – from interactive Flash-based lectures to templates and examples.
- ❑ Study for certification exams. Quizzes, examples and tools help you practice your skills and test your knowledge.

The Wizard

► Practical Exercises

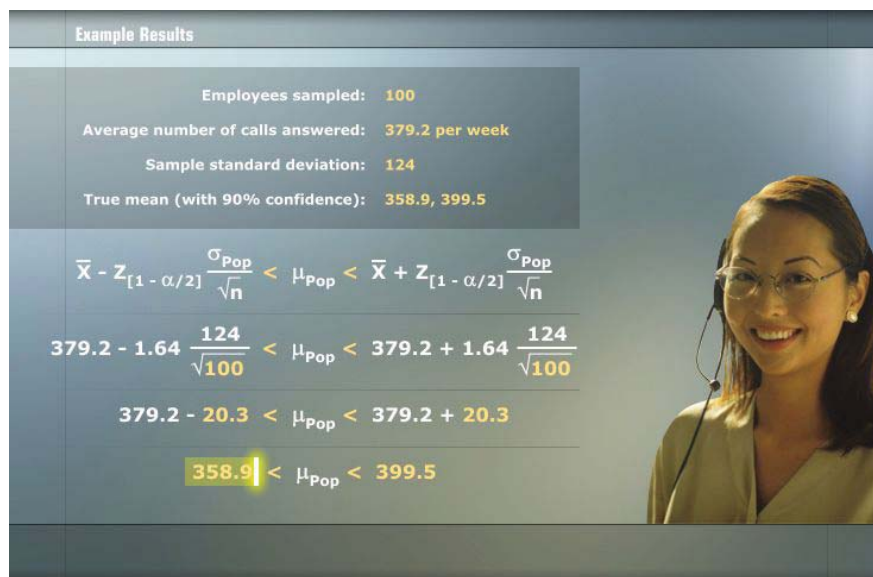

The Wizard includes sample exercises and solutions to example problems, providing practitioners with roadmaps to study and opportunity to practice using the tools within a variety of examples from multiple industries.

► Catalog of Supplemental Information

Students can browse the Wizard's catalog of supplemental material, including Lean Six Sigma tools and templates, course notes, case studies, industry information and more. The catalog is searchable by keyword, allowing students to access information on any topic quickly and easily.

► Includes iSixSigma Magazine Online

With a simple click from the Wizard home page, students have access to the current issue of "iSixSigma Magazine," the premier publication for the Lean Six Sigma industry. They also have access to the entire digital library of back issues, including a monthly detailed storyboard of a real-world DMAIC project.

The Wizard's interactive, Flash-based content allows students to review complex material as often as needed, and also makes learning fun.

► Minimum Hardware Requirements

- 333MHz or faster Intel CPU
- 128MB RAM
- 56K modem (DSL, Cable or T1 preferable)
- 800x600, 16-bit color monitor
- Soundcard, speakers/headphones

► Minimum Software Requirements

- Windows 98SE/NT 4.0/2000/XP
- Internet Explorer 6.0 or later
- Flash Player 6.0.40 or later

Additional requirements and configuration settings may apply.

"BMGI's Wizard is a big help because it provides you with the ability to go back and review lectures at any time."
